34	March, 2012	Health & Welfare	Reports	Mayumi Gondo and Yasunobu Nozaki (Eds.)	To live together in community with medical equipment: A report on the symposium: Surviving the earthquake and power cuts with patients receiving care at home and artificial ventilation users	Research Center for Ars Vivendi Report	An earthquake and a nuclear power accident occurred in Tohoku. How did the disabled and other patients survive this disaster? In particular, what were the effects of the rolling blackout on the patients cared for at home whose survival depended on medical equipment powered by electricity? This has hardly been discussed in public. Half a year after the earthquake, patients in Fukushima and Chiba worked together with those in Kyoto to hold a symposium. This volume reports on the symposium. In addition, the volume includes an illustrated manual for "carers" during power cuts, essays following the lives of symposium participants after the event, and articles on surveys on patients using medical equipment. Read this volume to learn more about what has happened.		http://www.ritsumeiarsovi.org/publications/index/type/center_reports/number/18	H	3	CFJ	Research Center for Ars Vivendi, Ritsumeikan University	arsvive@st.ritsumeiarsovi.ac.jp	None

The anxiety and ill-health of child & mother remains high and has been prolonged since the Fukushima nuclear accident.		http://mother-child.jp/healthwellness.com/	A, C, G	1	B, F, I, J	Department of Preventive Medicine and Public Health, Faculty of Medicine, Fukuoka University	Sung, Woncheol sungwonc@sass.chukyo-u.ac.jp	None
86	September, 2012	Reconstruction	Presentations	Kaoru Endo	How to survive the Great East Japan Earthquake: Towards a resilient social system	The 9th Annual Conference of the Career Design Institute-Japan: Keynote speech. Available at: http://www.career-design.org/content/view/277/40/ .	The Great East Japan Earthquake caused unprecedented damage to our society and revealed various hidden cleavages. There are a number of challenges ahead of us. However, Japan is one of the most earthquake- and tsunami-prone areas in the world. The emphasis on impermanence that is said to be peculiar to Japan might have developed as a result of these natural environmental factors. Legendary cities, such as Troy and Pompeii were destroyed by the overwhelming power of nature. However, Japanese society has survived for a long time despite being hit by a number of unimaginable disasters. The lecture analyzes and re-evaluates the resilience of Japanese society, and considers resilient career design in a post-Earthquake society.			なし	3	H,I,J	None	Kaoru ENDO kaoru.endo@gakushuin.ac.jp

206	May, 2013	Database	Presentations	Noriko Iwai and Kuniaki Shishido	Impact of the Great East Japan Earthquake, Tsunami, and the Fukushima Nuclear Accident on Japanese People's Attitudes and Behavior: A study based on Japanese General Social Surveys	WAPOR (World Association for Public Opinion Research) 66th Annual Conference, Boston.	Changes in the attitudes and behavior of Japanese people-- a) social capital, b) risk perception, and c) power saving behavior--before and after the Great East Japan Earthquake 2011 and Fukushima nuclear accident were examined based on JGSS datasets. The effect of one's risk perception of nuclear power accident on one's attitude toward nuclear power policy has been found to vary depending upon the geographical distance from respondent's residence area to the nearest nuclear power plant. 209	February, 2013	Database	Articles	Kuniaki Shishido and Tomohiko Takeuchi	Donation behavior and voluntary activities at the Great East Japan Earthquake	Japan Finance Corporation Chosa Geppo (monthly report), February.	The paper examines the effect of the Great East Japan Earthquake on donation behavior and voluntary activities undertaken by the Japanese based on JGSS-2012 data. Donation behavior is analyzed comparatively with JGSS-2005 data, and voluntary activities are analyzed comparatively with JGSS-2010. Regression analysis has identified attributes of the strata where donation behavior and voluntary activities have intensified due to the Earthquake.	No	http://www.jfc.go.jp/n/findings/pdf/tyousa_gttupou_1302.pdf	D	3	F	JGSS Research Center	jgss@daishodai.ac.jp	None	
210	March, 2013	Database	Articles	Takayuki Sasaki and Kunisuke Hamada	Electricity-saving behavior and use of renewable energy	Japan Finance Corporation Chosa: Geppo (monthly report), March.	The paper examines the effect of the Great East Japan Earthquake on electricity-saving behavior and the use of energy-saving products by the Japanese based on JGSS-2012 data. A comparative analysis with JGSS-2010 is also carried out. Regression analysis has identified attributes of the strata where electricity-saving behavior and use of energy saving products have intensified due to the Earthquake.	No	http://www.jfc.go.jp/n/findings/pdf/tyousa_gttupou_1303.pdf	D	3	G	JGSS Research Center	jgss@daishodai.ac.jp	None

Bulletin of Edogawa University, no. 23	This report is studying about a pilot program of disaster prepared practice. Multi stake holder members of the council for safe area management have cooperated in the pilot program of making GIS map and getting around their neighborhood. Developing disaster prevention map drawn by GIS and the mapping process are connecting to building community.		http://www.city.nagareyama.chiba.jp/life/35/016231.html	D	2	D, I		ouchi@edogawa-u.ac.jp
