Website <http://www.wssf2018.org/>

The International Social
Science Council (ISSC)

- is a membership-based scientific organization, established by UNESCO in 1952.
- is the primary body representing the social, economic, and behavioral sciences at a global level.
- aims to bring the best social science to bear on the biggest social challenges of our times.
- has supported a number of international research initiatives around the world including *Future Earth*.

Main Theme

Security and Equality for Sustainable Futures

Invitation from Chair of the WSSF2018
Local Organizing Committee

"The social sciences and humanities have a vital role to play in achieving security and equality for sustainable futures, in dialogue with citizens and decision makers. We look forward to welcoming participants to Fukuoka, to share and expand the knowledge that can help create a more sustainable world. Fukuoka is an outward-looking city, characterized by its coastal location and history as a regional trading hub. It is fitting location for the first World Social Science Forum in Asia"

Kazuo Miyamoto
Vice-president, Kyushu Univ.

** This is an excerpt. For his full message, please see <http://www.wssf2018.org/>. Thank you.

Subthemes

1. Sustainability and security
2. Cybersecurity, cyberattacks, hybrid warfare
3. Human security
4. Security and the 2030 Agenda
5. Globalization, diversity, and cultures of belonging
6. Development and inclusion in urban and rural area
7. Gender equality and security
8. Health, safety and biosecurity
9. Freedom, democracy and security

The growing complexity of the challenges facing societies worldwide has given rise to increasing concerns about security, across a range of different sectors. Life in the Anthropocene era is calling into question the sustainability of human activities, with critical implications for equity, and for food, water and energy security. From issues of freedom and democracy to cyber- and bio-warfare, the changing nature of conflict highlights the complexity and interrelatedness of old and new threats to human security. The Forum seeks to create a platform for interdisciplinary and transdisciplinary research, to contribute to transformations to the sustainable world.
